

As a xm-radio SUBSCRIBER I turn to the weather and traffic channels because I am a trucker and like to know what is going on in the areas that i will travel thru for that day. I feel that they are more informative than the local am/fm radio. It can take alot longer to tune to a radio in the area and then you have to wait till their updates are done. Lots of times their reports are filed after the conditions are already cleared up. With xm-radio they are instant. I can rely on the much more. If i was recieving this information for free then I would tend to side with the "NAB" But i am paying for this service so i will side with xm-radio..Their signals are crystal clear, not like the am/fm. If you travel alot like I do you will appreciate what xm-radio has done for the public. It may cost a little each month to have this service but I feel that it is the greatest thing to happen to RADIO. At this time I would respectfully ask that you "REJECT" the NAB's petition 04-160 and support xm-radio's ability to provide such clear and quality prograhming
